

Focused Paradisamide Composition

Lean, Purpose-Built Formula

June 6, 2025

1 Formula Overview

A focused composition showcasing paradisamide's burnt rubber \rightarrow guava transformation. Every ingredient supports or enhances this molecular journey without distraction.

2 Ingredients

Ingredient	Category	Dilution (%)	Amount (μ L)	Active (μ L)
Galaxolide	Musk Foundation	27	90	\sim 24
Paradisamide	Star Material	1	180	1.8
Tonkin Deer Musk	Base Anchor	3	20	0.6
Bulgarian Rose Absolute	Heart Support	1	50	0.5
Hedione	Radiant Bridge	100	20	20
Bergamot EO	Clean Opening	100	25	25
Pink Pepper EO	Spice Opening	100	3	3
Galbanum Oil	Green Edge	10	10	1
Ethanol	Carrier	100	602	—

Table 1: Focused Paradisamide Formula

3 Final Composition

- **Total Volume:** 1000 μ L (1ml)
- **Total Active Materials:** 75.9 μ L
- **Final Concentration:** 7.6% (EDT strength)
- **Active Musk Content:** 26.4 μ L (34.8% of active materials)
- **Ethanol Content:** 602 μ L (60.2%)

4 Fragrance Architecture

Opening: Bergamot brightness + pink pepper warmth + galbanum's sharp green edge

Transition: Paradisamide's burnt rubber facet enhanced by galbanum's industrial quality

Heart: Rose absolute + hedione radiance complementing paradisamide's guava evolution

Base: Tonkin musk as sole animalic anchor + galaxolide clean foundation

5 Design Philosophy

- **Focused, not minimal:** Every ingredient supports the paradisamide journey
- **Galbanum enhancement:** Sharp green bite prepares nose for burnt rubber transition
- **Rose-guava harmony:** Bulgarian rose's honeyed character complements tropical evolution
- **Tonkin as sole anchor:** Raw animalic backbone without competing woody elements
- **Hedione transparency:** Radiant bridge that doesn't interfere with main story

6 Technical Notes

- Paradisamide dosage conservative based on previous overpowering experience
- Galbanum at 10% dilution for controlled sharp green impact
- Bulgarian rose at 1% dilution for subtle heart support
- Tonkin provides structural depth without sandalwood competition
- 7.6% concentration optimal for daily wear with potent materials
- Maturation: 72 hours minimum for proper integration

7 Mixing Instructions

1. Add galaxolide (90µL)
2. Add paradisamide (180µL)
3. Add tonkin deer musk (20µL)
4. Add Bulgarian rose absolute (50µL)
5. Add hedione (20µL)
6. Add bergamot EO (25µL)
7. Add pink pepper EO (3µL)
8. Add galbanum oil (10µL)
9. Top with ethanol to 1ml total volume (602µL)
10. Mix gently and allow to mature
