

Peach Tea

A natural tea field with dry fruity-floral warmth, meadow citrus, and resinous chypre depth

Naturals-Only 1ml Fragrance Recipe

Ingredient	Amount
Order of Addition (Bottom to Top):	
IPM (Carrier)	740 microliters
3% Deer Musk Tincture	20 microliters
10% Boronia Absolute (in IPM)	15 microliters
10% Black Currant Bud Absolute (in IPM)	10 microliters
10% Violet Leaf Absolute (in IPM)	10 microliters
10% Vanilla Absolute (in IPM)	15 microliters
Frankincense Frereana EO	12 microliters
Neroli EO	18 microliters
Pink Pepper EO (undiluted)	10 microliters
Coriander EO	15 microliters
Lime EO	20 microliters
Lemon EO	20 microliters
Bergamot EO	35 microliters

Concentration Analysis

- **Citrus Notes (7.5%):**
 - Bergamot EO: 35 microliters (3.5%)
 - Lemon EO: 20 microliters (2%)
 - Lime EO: 20 microliters (2%)
- **Spice Elements (2.5%):**
 - Coriander EO: 15 microliters (1.5%)
 - Pink Pepper EO: 10 microliters (1%)
- **Floral-Tea-Fruity-Resin Notes (4.5%):**
 - 10% Boronia Absolute: 15 microliters (0.15% final)
 - 10% Black Currant Bud Absolute: 10 microliters (0.1% final)
 - 10% Violet Leaf Absolute: 10 microliters (0.1% final)
 - 10% Vanilla Absolute: 15 microliters (0.15% final)
 - Neroli EO: 18 microliters (1.8%)
 - Frankincense Frereana EO: 12 microliters (1.2%)
 - 3% Deer Musk Tincture: 20 microliters (0.06% final)
- **Carrier:**
 - Isopropyl Myristate (IPM): 740 microliters (74.0%)

Expected Scent Profile

Top Notes (5-30 minutes): A crisp burst of bergamot, lemon, and lime, with pink pepper's fruity-spicy zing and violet leaf's subtle purple-green fizz, evokes a sunlit meadow with a dry, citrusy breeze, humble yet vibrant like a Kyushu morning.

Heart Notes (30 min - 3 hours): Boronia's pu-erh tea-like floralcy blooms alongside neroli's radiant, honeyed warmth, lifted by coriander's fresh, citrusy-spicy spark. Black currant adds a dry, tangy fruitiness, mimicking osmanthus's peachy glow, creating a simple tea field with sly Rush-like complexity.

Base Notes (3-6+ hours): Frankincense's dry, resinous warmth blends with deer musk's soft muskiness and a whisper of vanilla's dry sweetness, grounded by boronia's lingering floral trace. The base is understated, like a Scottish moor, yet rich with a resinous chypre depth, evoking quiet elegance.

Overall Performance: Peach Tea wears for 4-6 hours with moderate projection, a natural, artisanal blend that's humble and dry, with fruity-floral tea warmth, meadow citrus, and resinous chypre depth. It's a teacher's scent—bold yet intimate, reflecting a half-Japanese, half-Scottish storyteller with Kyushu tea fields and Scottish moors, inspired by Gucci Rush's coriander-rich chypre elegance.

Preparation Instructions

1. Begin with IPM carrier in a 1ml vial.
2. Add each ingredient in the specified order, using separate micropipette tips for each.
3. Warm viscous absolutes (e.g., boronia, black currant, violet leaf, vanilla) to 40-50°C for easier handling.
4. Seal vial and roll gently to blend without introducing air bubbles.
5. Allow to rest 24-48 hours in a cool, dark place for notes to meld.
6. Test on skin or beard, noting coriander's spicy freshness and frankincense's resinous depth; adjust coriander (12-18 microliters) or black currant (8-12 microliters) if needed.

Notes for Future Batches

- Use DPG for 10% dilutions (boronia, black currant, violet leaf, vanilla) if available for smoother blending.
- Store black currant absolute (1.9g remaining) in the fridge; store frankincense, neroli, pink pepper, coriander, lime, lemon, bergamot in a cool, dark place.
- If coriander feels too green, reduce to 12 microliters; if heart needs more Rush-like spice, increase to 18 microliters.
- If black currant is too cola-like, reduce to 8 microliters; if fruity heart is weak, increase to 12 microliters.
- If vanilla feels too sweet, reduce to 10 microliters; if base needs warmth, increase to 20 microliters.
- Warm viscous absolutes to 40-50°C for easier handling.
